OBJECTIVE

A front-end web developer with 2years experience in creating user interface website for desktop and mobile use. My vision is to help businesses build custom website that will have significant effect on the growth of their business.

WORK EXPERIENCE

2019-2020
Front end developer (Freelancer)
I worked as a freelancer online as a front-end developer. I was rendering alot of services such as product landing page design, full page website, etc. I worked with HTML, CSS and Javascript Languages.

2020-2021
Front-end Developer & Technical Support Team
I worked as a front-end developer and also a technical support lead team at Flyte Technology and Solution Ltd. I was building user-interface design for software and web applications. Also I was involved in supporting clients with troubleshooting issues.
